

NEURO ANATOMY

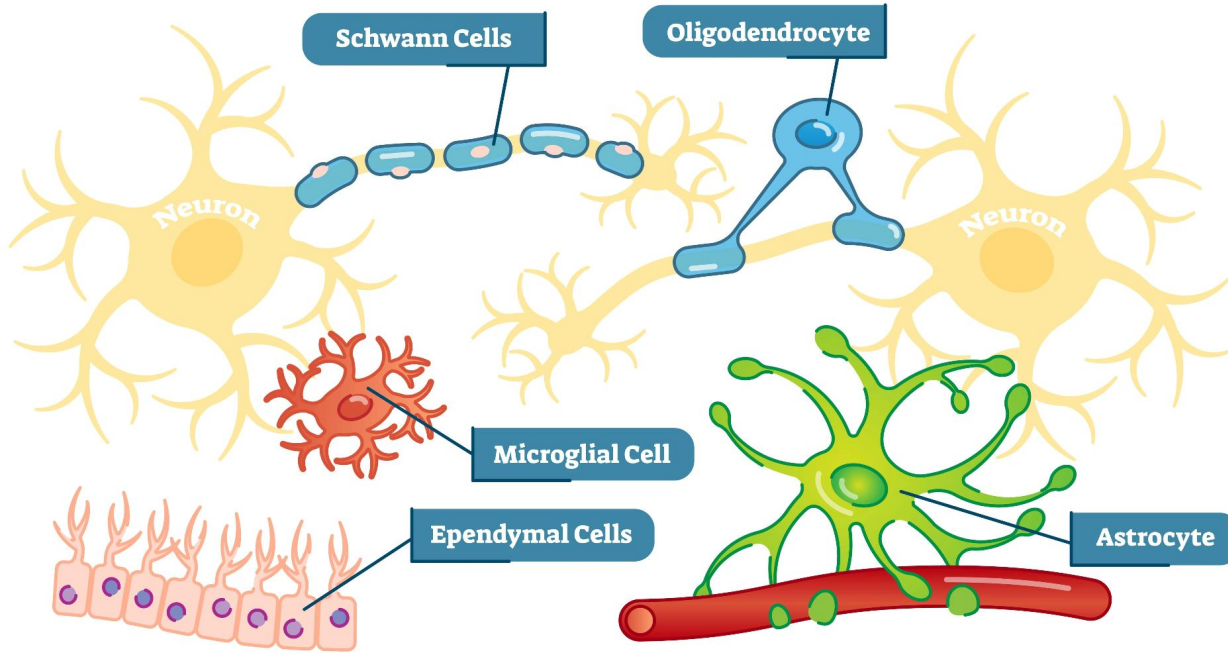

What Is a Neuron?

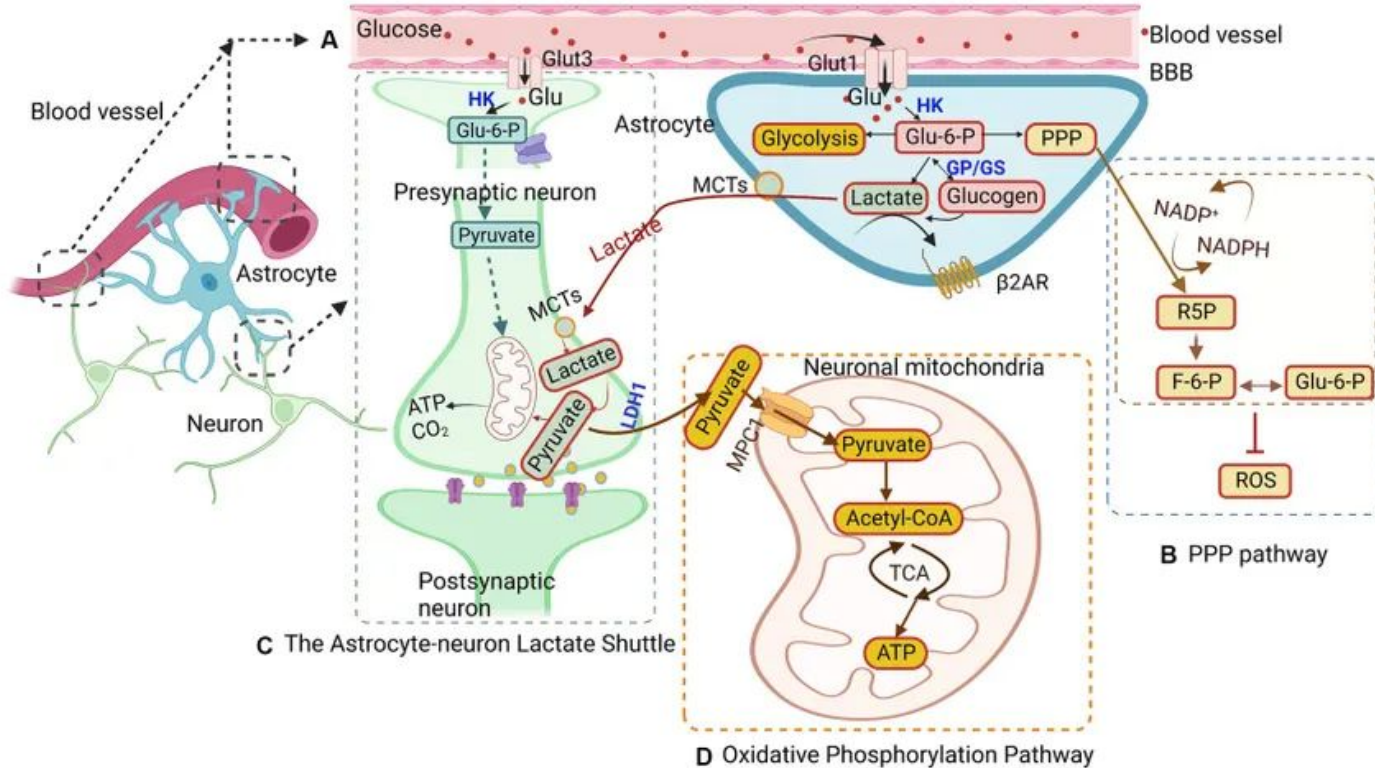

Electromagnetic fields in the brain (EEG)

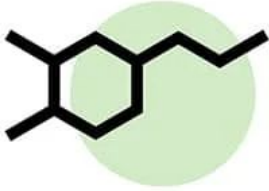

What Are Glial Cells and What Do They Do?

Flow of oxygenated blood in the brain (fMRI)

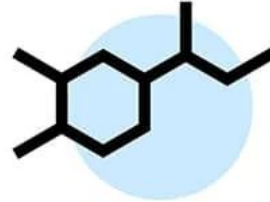

What Are Neurotransmitters?

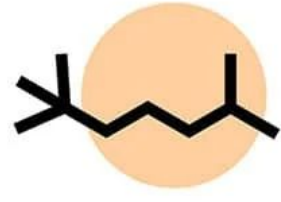

DOPAMINE

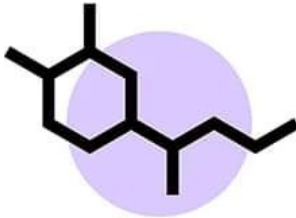

SEROTONIN

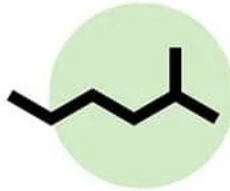

NOREPINEPHRINE

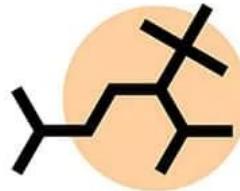

ACETYLCHOLINE

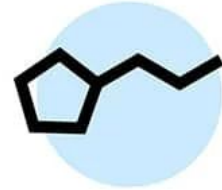

ADRENALINE

GABA

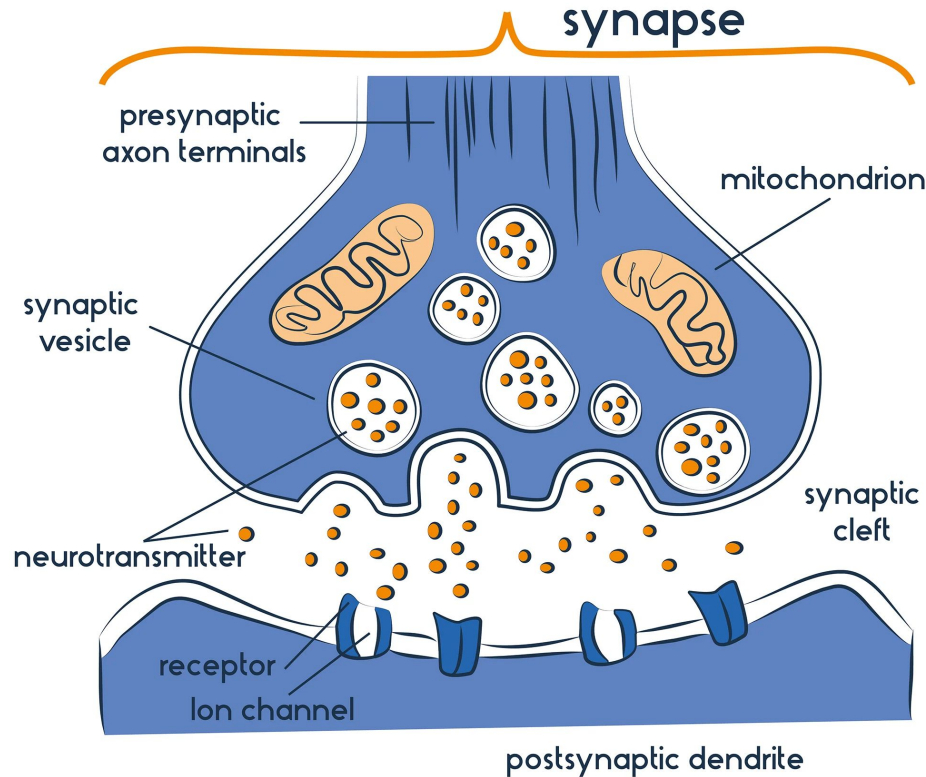

GLUTAMATE

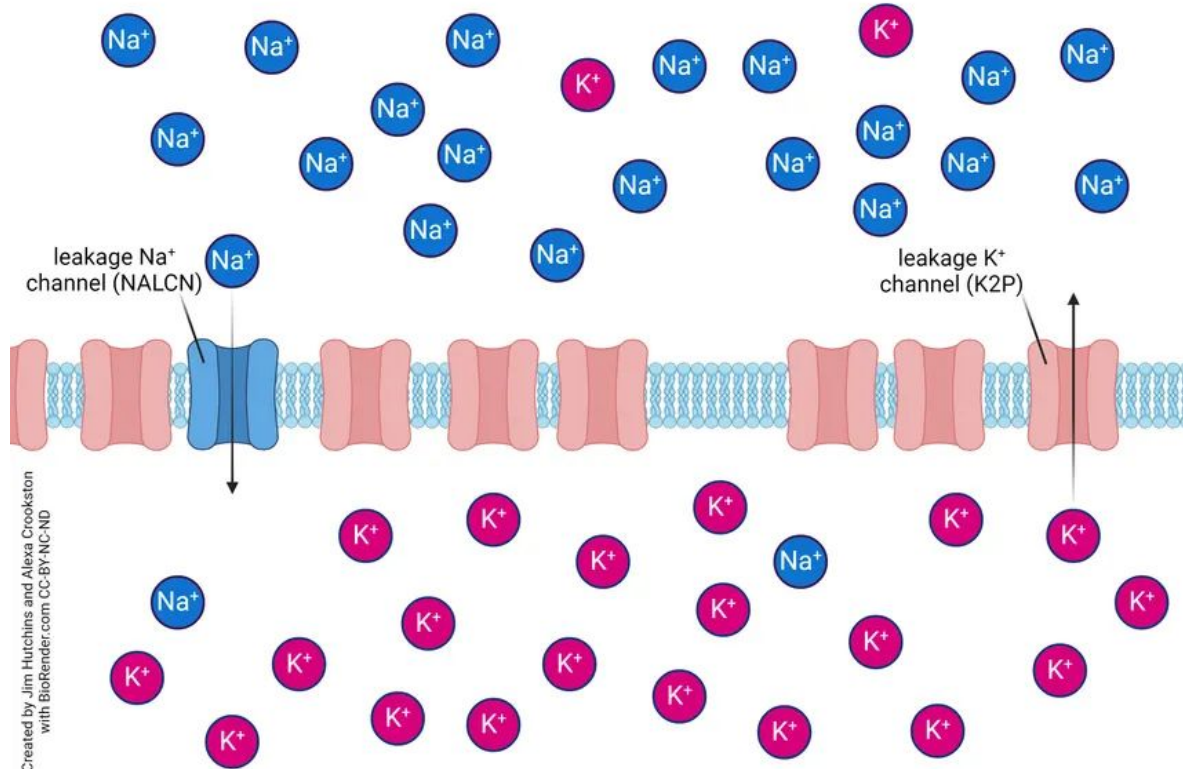

HISTAMINE

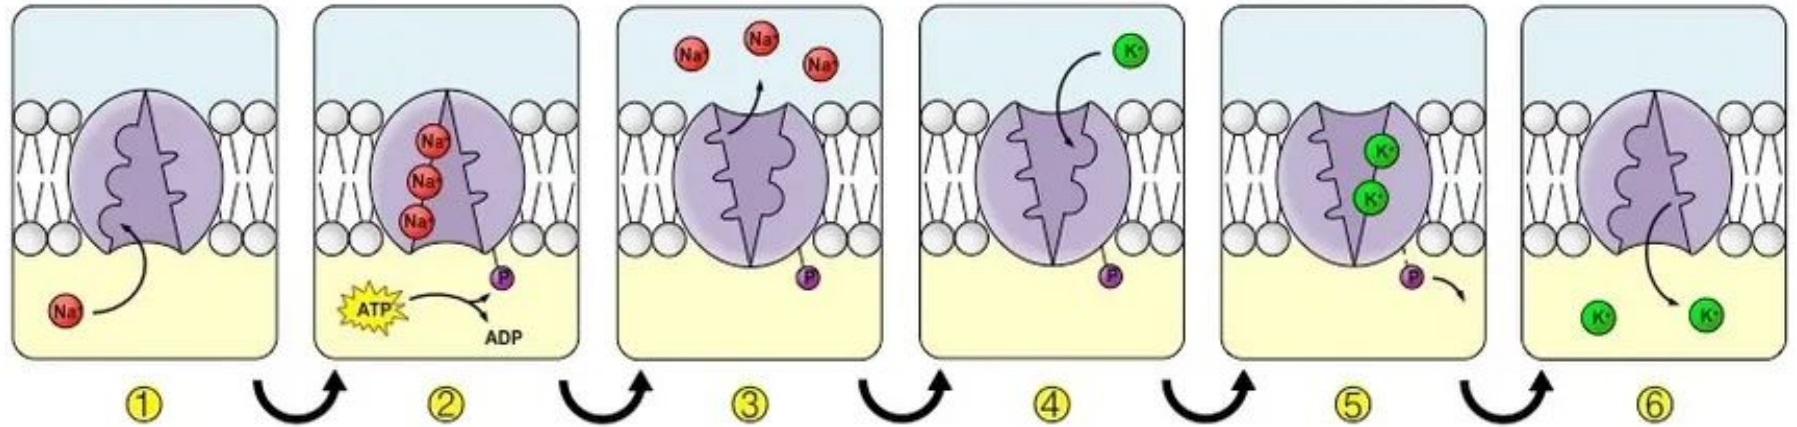

What Happens At The Synapse Level?

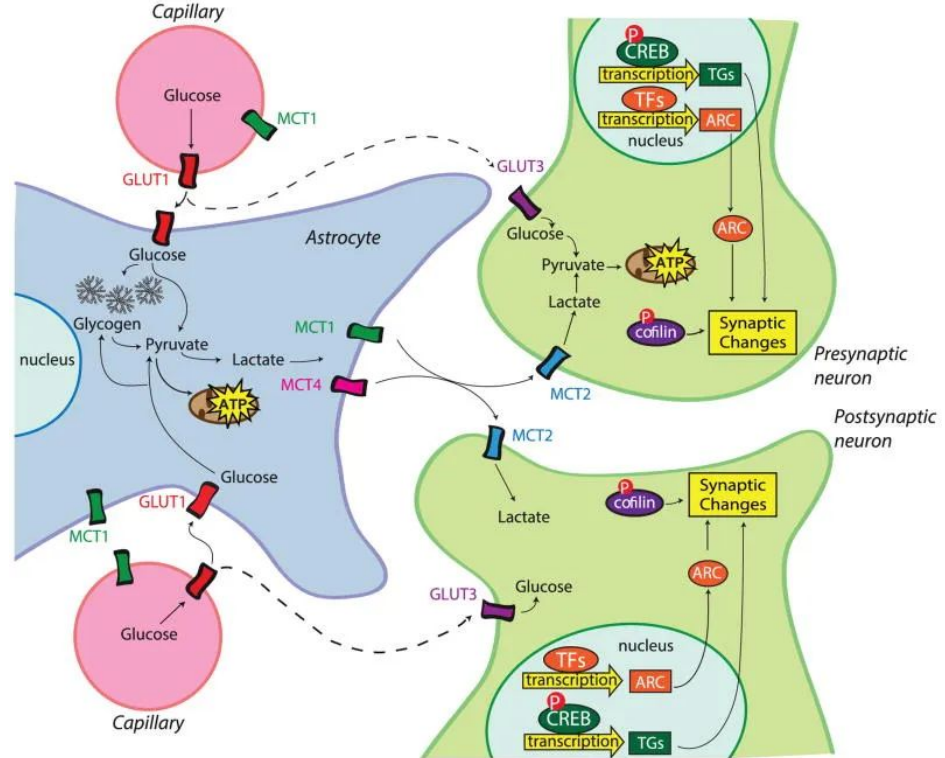

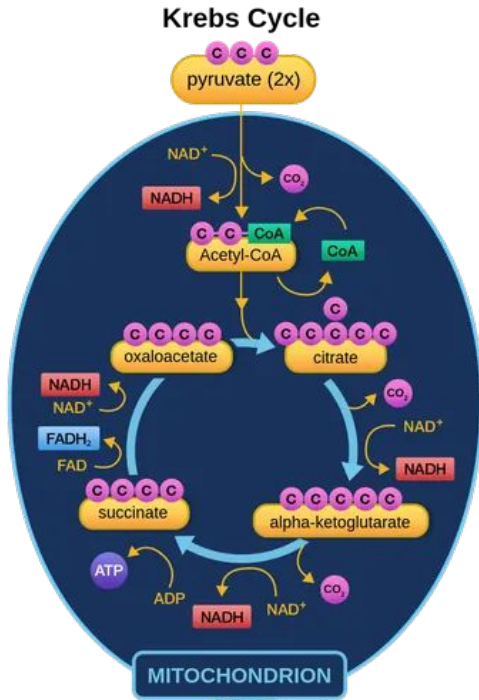

What Is Action Potential?

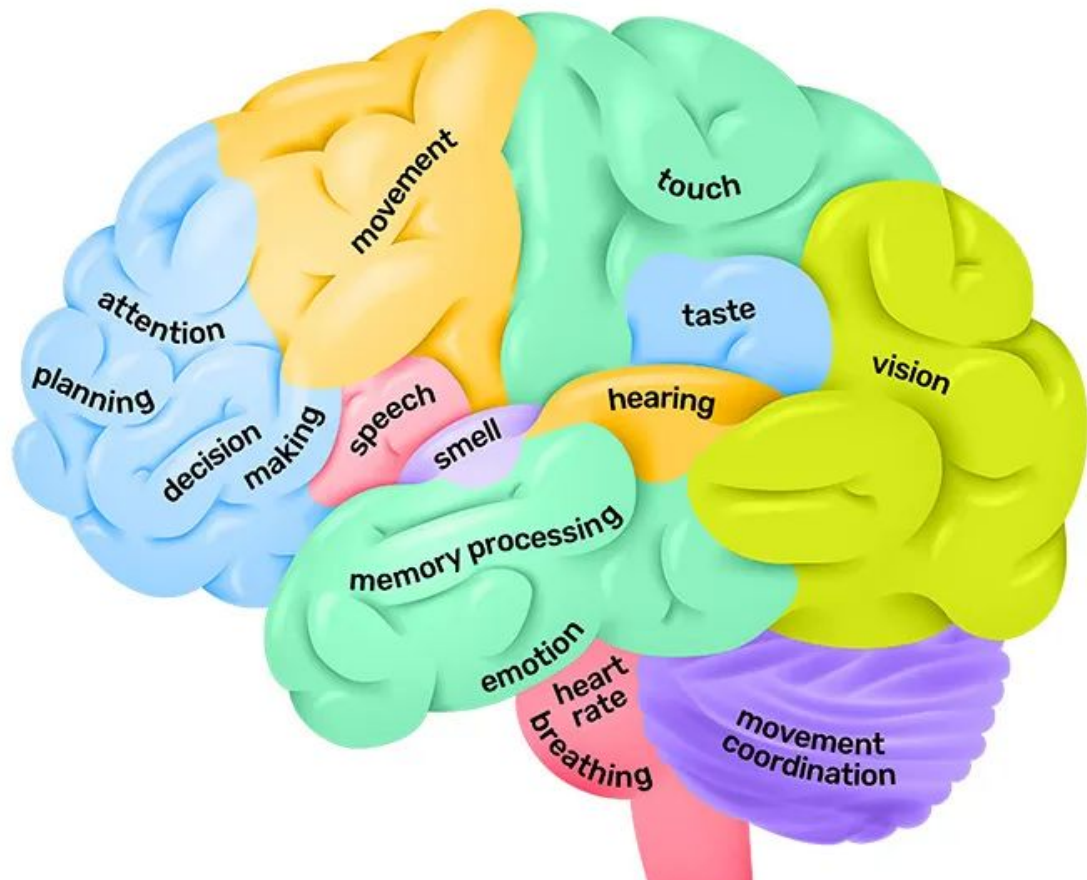

Why we need Oxygen and Glucose?

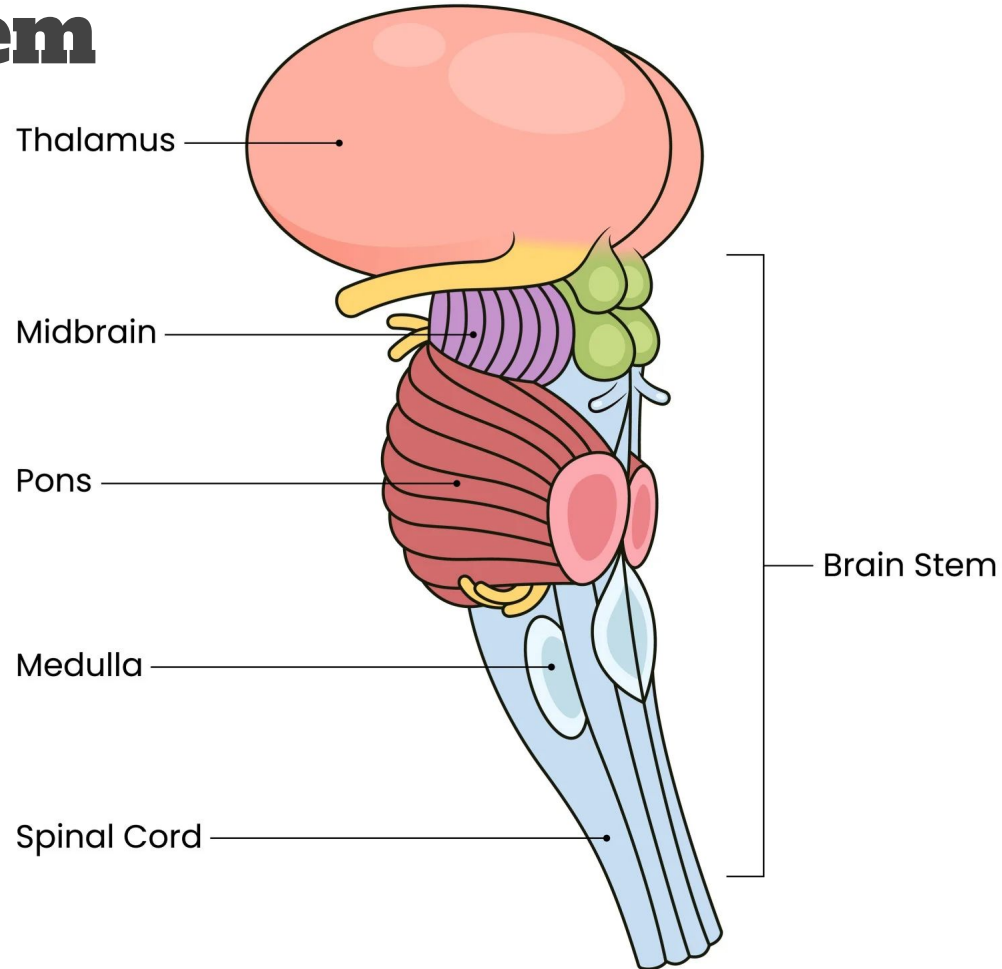

Why we need Astrocytes?

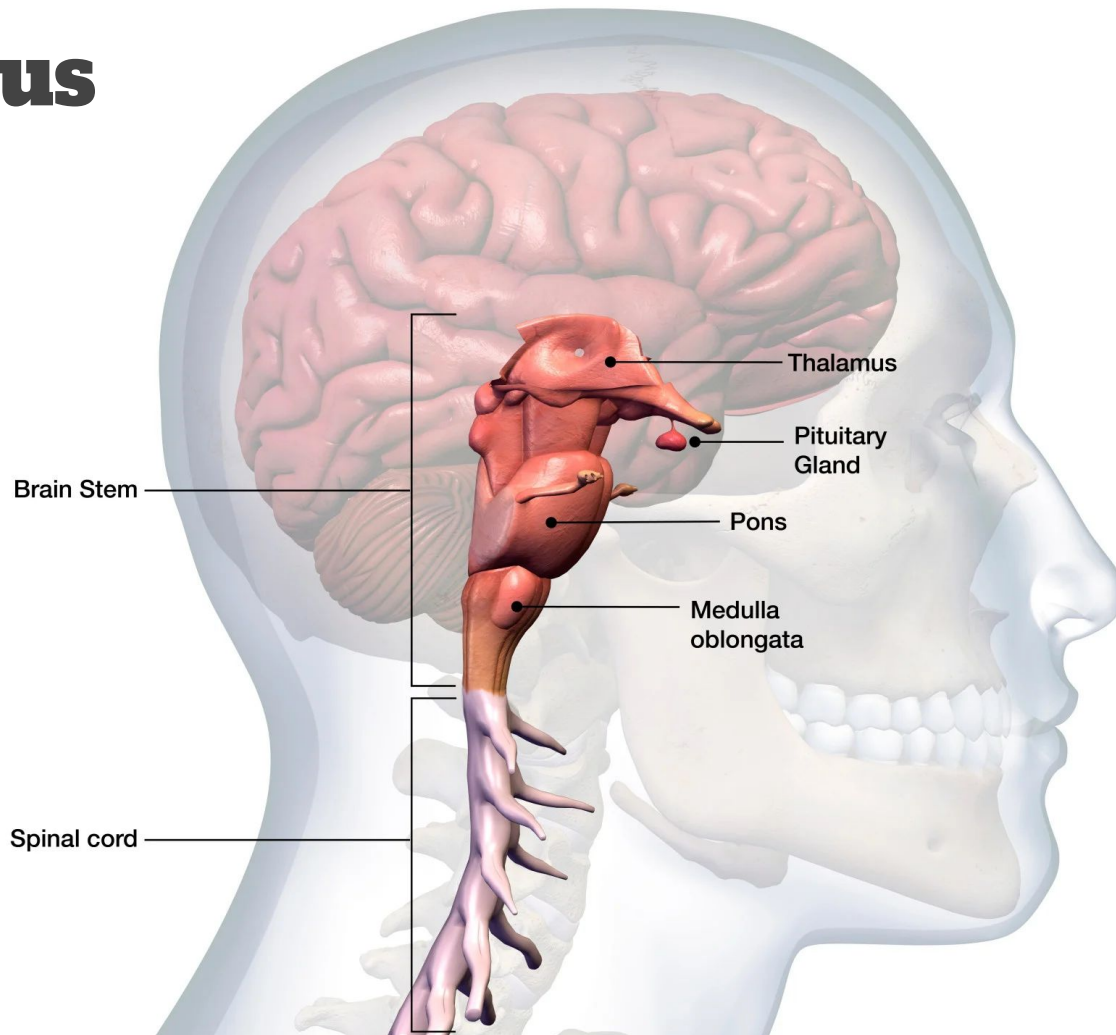

Brain Functions

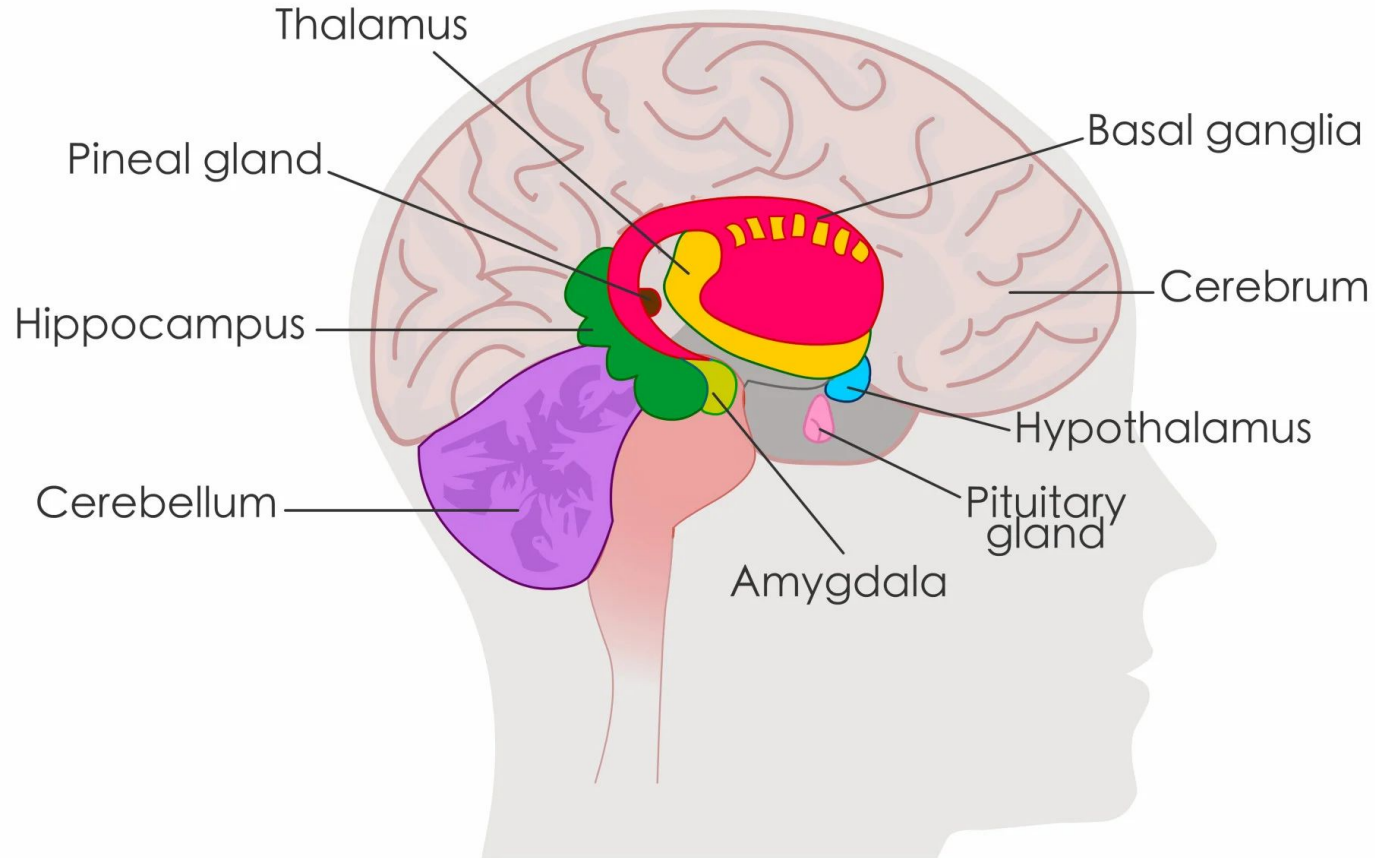

Brainstem

Thalamus

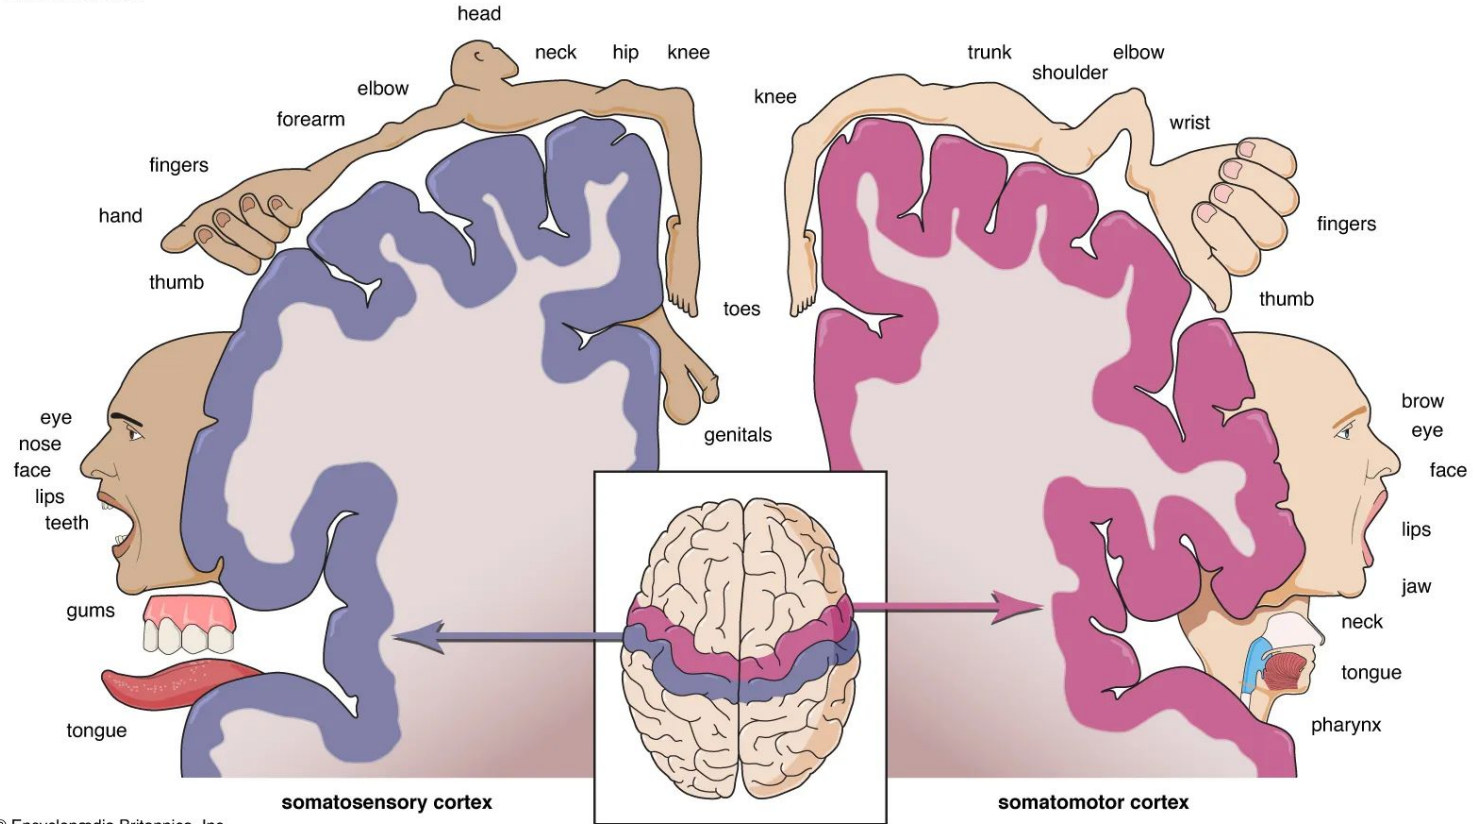

Limbic system

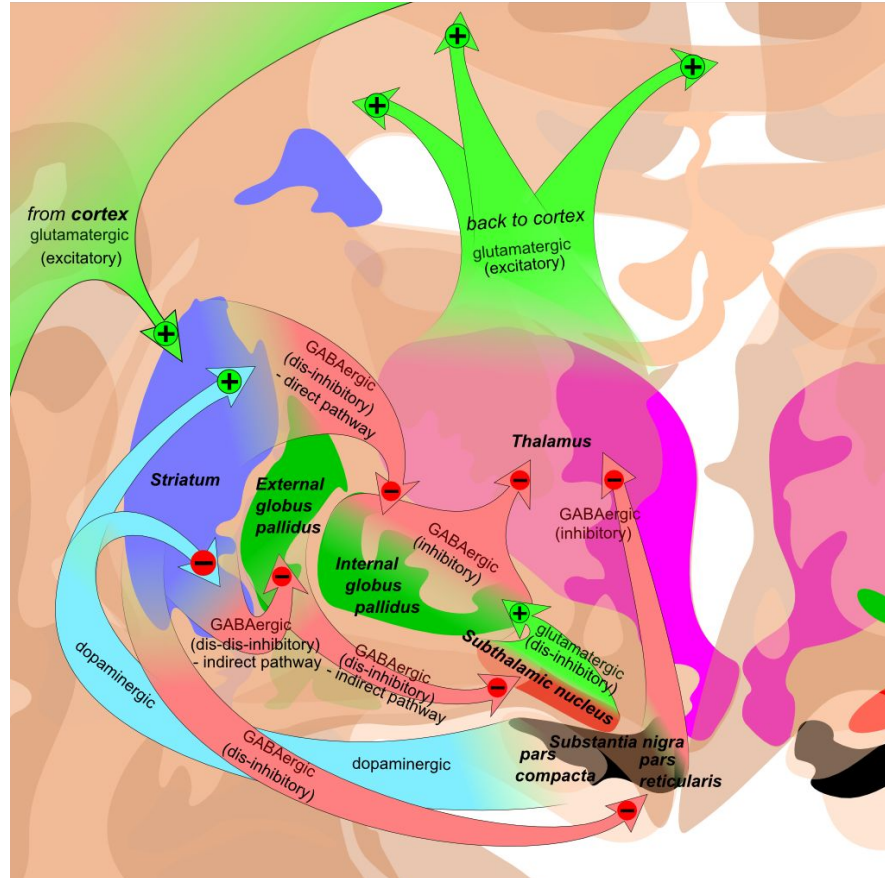

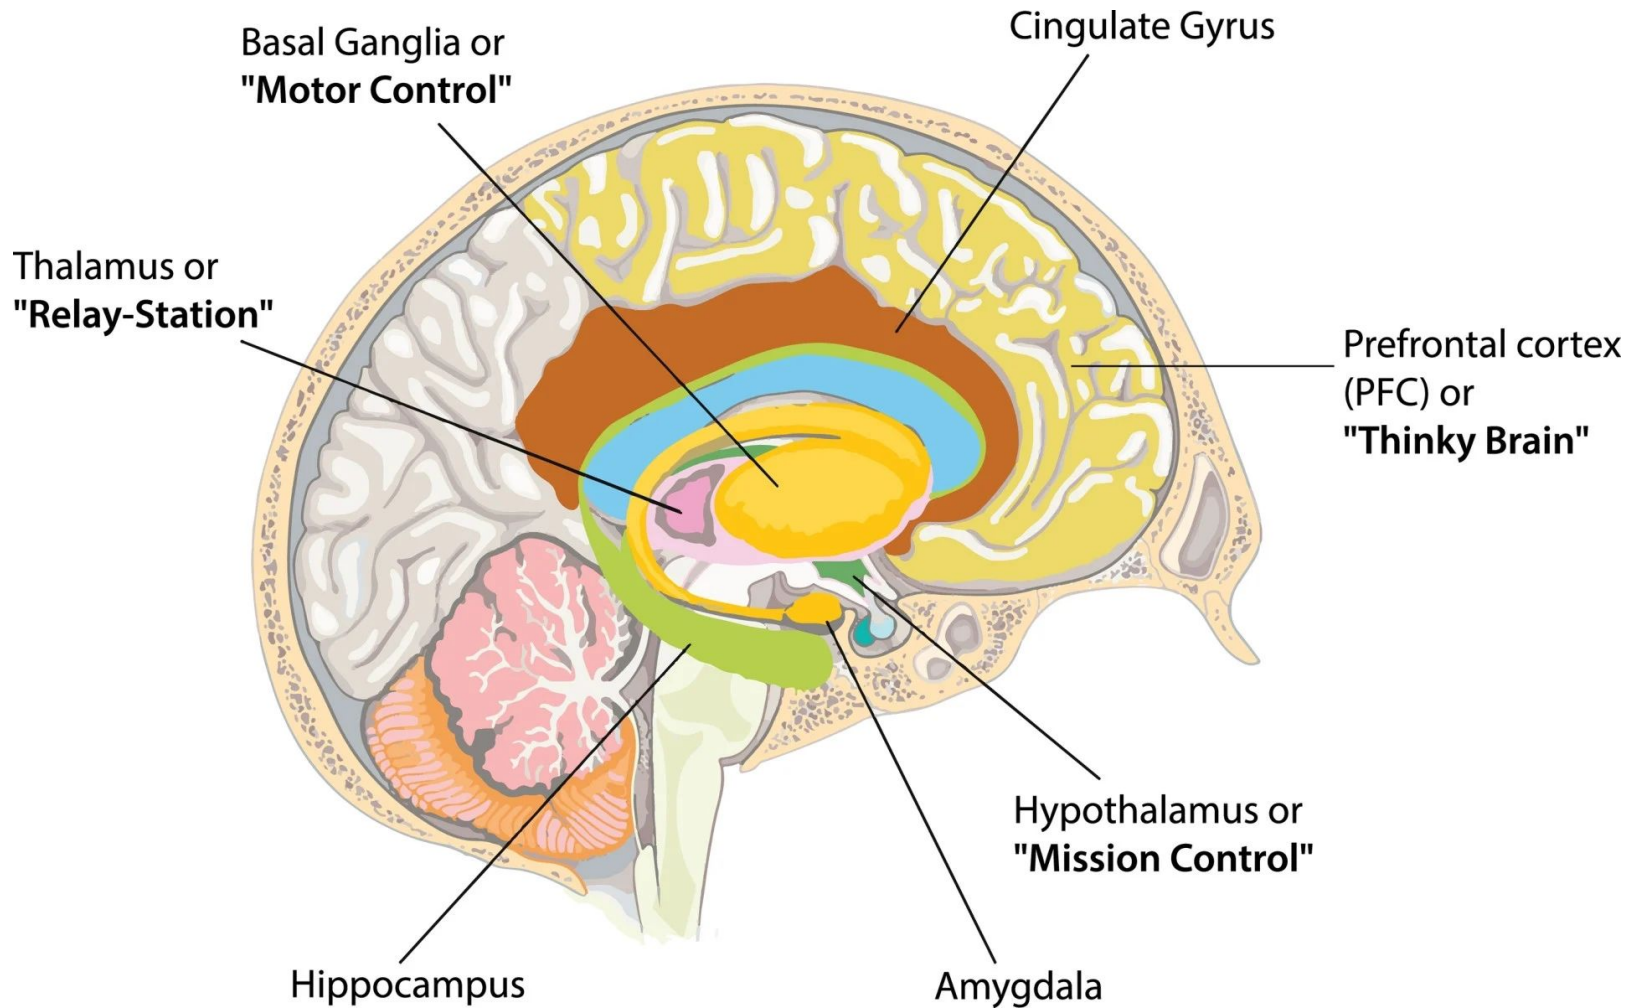

Motor system

Homunculus

Basal Ganglia

Thank you for your attention!
